EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's attorneys, **Mr. Jerry L. Seemann** and **Mr. James McGroary** on Friday, January 21, 2005.

The application has been amended as follows:

In the Claims:

Claim 1, line 9, after "satisfying a", insert---**radius-independent**---

Claim 8, line 11, after "satisfying a", insert---**radius-independent**---

Claim 15, line 8, after "satisfying a", insert---**radius-independent**---

Claim 21, line 10, after "satisfying a", insert---**radius-independent**---

2. The following is an examiner's statement of reasons for allowance: After a review of the prior art of record and Applicant's arguments, it is believed that the present invention is novel and non-obvious wherein no reference discloses an orifice plate adapted to be positioned within a conduit and extend across a transverse cross section of the conduit, the plate defined by a central circular region having a radius

and a ring-shaped region surrounding the central circular region, including a hole structure in which a plurality of holes is provided at a number of radii of the ring-shaped region of the plate, with the holes associated with each radii satisfying a radius-independent, flow-based relationship and such that one or more process variables associated with the flow moving through the orifice plates are approximately equal for each such radius, thus making the area of the holes provided at any radius independent of the area of holes associated with other radius. The orifice plates of **Laws et al.** and **Hall et al.** each discloses a relationship governing the hole structure that makes the hole areas associated with adjacent radii mathematically dependent on one another.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Patrick F. Brinson** whose telephone number is (571) 272-4897. The examiner can normally be reached on M-F 7:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Michael Y. Mar** can be reached on (571) 272-4906. The fax phone

number for the organization where this application or proceeding is assigned is 703-872-9306.
